### DETAILED ACTION

1. Claims 26-28, 30-33 and 35-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 128046.

The reference discloses a process of making a reactor blend of homopolyethylene and ethylene copolymer (pg. 3, lines 10-29; pg. 4, line 27 through page 5, line 7). The examples show that use of two dissimilar metallocenes of specific structures results in a blend of polyethylene and ethylene/olefin copolymer. The reference states that the copolymer comprises one or more olefin comonomers, and specifically names propylene, butene, hexene and octene. Although a working example within the scope of the claims is not included, one of ordinary skill in the art would be motivated to make a blend comprising a copolymer including the claimed monomers because the reference has specifically named these monomers and has stated that the copolymer may comprise more than one olefin in addition to ethylene. Optional use of supported catalysts for gas phase use is recommended at page 10, lines 16-21.

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1713

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
